specifier solutions

Architect Approved: A collection of concise, cut-to-the-chase case studies, Specifiers' Solution delves directly into how specific products and technologies have helped design teams overcome particular challenges or presented a solution that was not readily apparent.

Spotlighted: At Chicago's Northwestern Hospital, energy efficiency, cleanliness and maintenance concerns are significant issues when it comes to the facility's operation. As a result, the hospital, in retrofitting its restrooms, has turned to high-power electric hand dryers from Excel Dryer. **[PAGE 108]**

SPECIFIERS' SOLUTION

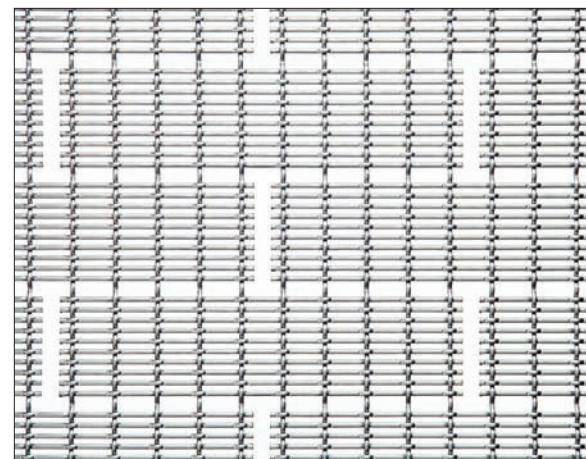

↑ HARD EXTERIOR

Coverings ETC's Bio-Luminum high-tech tiles are made from reclaimed aircraft parts, which is 100% post-consumer recycled aluminum. It's a new medium for walls and floors. The tiles are beveled on one side and have a straight edge on the other allowing design flexibility. The tiles are not pre-sealed and the aluminum can tarnish or discolor if not sealed or waxed. Visit www.coveringsetc.com or Circle (489)

↑ IN OVER YOUR HEAD

Finelite has added an LED offering to its high-performance recessed (HPR) collection of overhead lighting fixtures. The LED units are available in a range of size configurations, with several door and optics styles; daylight and occupancy sensors can also be specified. The HPR line also includes models with fluorescent light engines for use with T8, T5 and T5HO lamps. Visit www.finelite.com or Circle (488)

↑ NO MORTAR NECESSARY

The third little pig has recently renovated with Brick, the latest mesh pattern from **Cambridge Architectural**. Ideal for interiors, the iconic design features rigid, open waves that create a 50% open area and weighs only 2.3 lb per square foot. Brick is available in T304 or T316 stainless steel and can be produced at a maximum width of 60 in. and length up to 120 in. Visit www.cambridgearchitectural.com or Circle (487)

↓ GREAT OUTDOORS

The Dayton wall-mount luminaire is one of eight new offerings in the 2012 outdoor and landscape collection from **Troy Lighting**. The line ranges from contemporary wall-mounts to LED floodlights, along with more traditional styles. Visit www.troy-lighting.com or Circle (486)

↓ COLOR WASHED

Republic of Fritz Hansen's Series 7 chair celebrates the design's natural beauty as the chair is brought back into its original form in a series of wooden veneer variations. As the original material chosen by Danish architect Arne Jacobsen to furnish the Series 7 design, wood is an important part of Scandinavian design history. The company recently introduced nine new colors inspired by the original color palette designed by Arne Jacobsen in 1968, including white, light grey, dark grey, black, yellow, orange, red, petrol blue and sage green.
