

CoveringsETC in Pittsburgh Green Dream Home

CoveringsETC is proud to be part of the Pittsburgh area "Green Dream" home of Lou and Amy Weiss. The 4800sf home, featuring **CoveringsETC** products throughout, was designed in collaboration between renowned architect firms of **Hugh Newell Jacobsen** and **Seigle, Solow, and Horne** with the goal of merging contemporary architecture with a green footprint. Lou and Amy own a green products rep firm and offer the **ECoverings** lines in the Western PA region. The design and construction of the residence was planned in accordance with United States Green Building Council (USGBC) standards with the goal of meeting Leadership in Energy and Environmental Design (LEED) requirements. The house is applying for LEED Platinum certification.

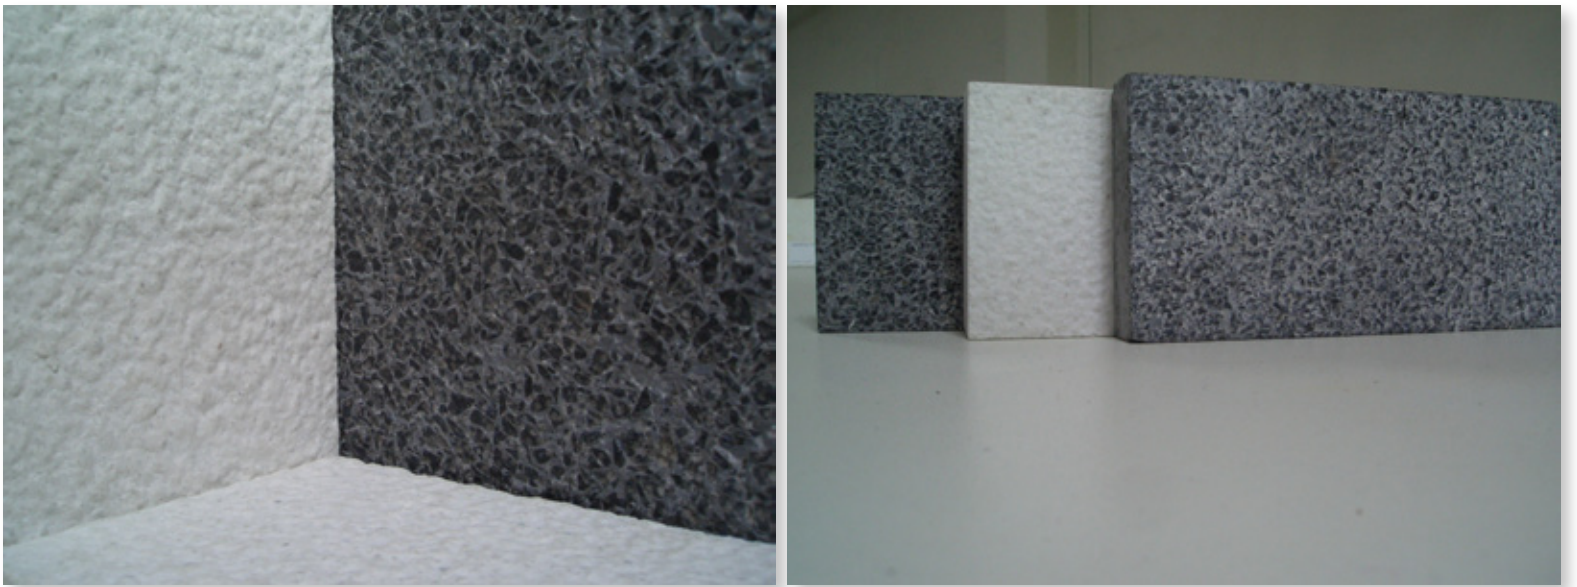

Bio-Luminum tiles, manufactured from retired aircraft, cover the kitchen walls and add a contemporary spark to the updated country kitchen, from where Amy oversees her well-stocked vegetable and flower garden. "The **Bio-Luminum** tiles are green of course but their texture and patina looks as if they were hand crafted by an artist", observes Lou.

Other sustainable features of the home include cork and rubber flooring, rainwater harvesting, windmill power and energy efficient spray foam insulation.

Bio-Glass was used in the bathrooms as well as in their sun soaked dining room where Amy, a seasoned cook, hosts Shabbat dinners every Friday. Noguchi paper lanterns suspend 12 feet over the dining room table, spawning a romantic feel. Their use of the material in multiple areas is an example of how **Bio-Glass** proves to be a versatile surface.

ECO-TERR New Finishes

Always the innovator and known for unique and special finishes, **CoveringsETC** is pleased to launch an exciting new collection of **Eco-Terr** finishes. **Eco-Terr** is an ideal choice for those seeking to create a contemporary, ecologically conscious home or commercial project.

Well suited for cladding, unique floors, interior or exterior, our **Eco-Terr** finishes are an alternative to the ordinary. These large format tiles (with custom size potential) are available in a great new palette of 7 colors and 3 textures (Bare, Mist, and Russet).

Recent Government Projects
US Army Garrison at Fort Belvoir, VA
Thurgood Marshall United States Courthouse in NYC
US Navy Operations Service Center at Roanoke, VA

We would like to thank the designers involved on these large government projects. We are so glad that we were given the opportunity to help and are proud to be part of these great American facilities
