

Bio-Luminum® Lends Sophisticated Chic to Design

Miami, FL January 5, 2012 Bio-Luminum stands out in this renovated condominium project located in the Park Slope neighborhood of Brooklyn. The 1600sf living space, designed by Latent Productions Architecture is a fusion of elegance and sustainable smart design. Bio-Luminum was chosen primarily as a metallic complement to reclaimed barn wood that was used as custom wall surfacing. The unique, rich character of the Bio-Luminum tiles works harmoniously with the rich history of the reclaimed barn wood. In addition to wall covering, Bio-Luminum is featured throughout the home in display niches, at the fireplace, on cover panels and as a kitchen backsplash with the reclaimed wood cabinets. “The material has finished very well. It has become an important part of the design, and the contractor enjoyed its ease of installation”, notes Sean Dawson of Latent.

Bio-Luminum tiles are created by recycling aircraft cladding. This 100% recycled aluminum tile is a lightweight, sustainable design solution, closing yet another loop.

Coverings ETC is a US company based in Miami, FL with widespread distribution. For more information contact info@coveringsetc.com or visit www.coveringsetc.com
