

### Bio-Glass by CoveringsETC Wins Glass Magazine 2011 Crystal Achievement Award

Miami, Sept 14, 2011 CoveringsETC, a leading innovator and designer of sustainable hard surfaces, announces that Bio-Glass received a *Glass Magazine* 2011 Crystal Achievement Award as the “*Most Innovative Decorative Glass Product*”.

Sponsored by *Glass Magazine*, the industry’s leading publication recently announced the 2011 Crystal Achievement Award winners. Selected by a panel of judges representing all segments of the glass industry, the awards recognize the best products and glass applications the commercial, retail, and fabrication markets have to offer.

Bio-Glass is made from 100% recycled glass coming from beer bottles, wine bottles, water bottles and stemware gathered from recycling centers. It is 100% recyclable and available in white, light green, dark green, blue, and brown....all colors are true to their source – there are no colorants or epoxies added to Bio-Glass. The material can be used for countertops, partitions, facades, and other decorative surfaces. The layers of compressed glass create a unique pattern through which light permeates.

“We’re extremely humbled to be recognized for our efforts with this award”, says CoveringsETC founder Ofer Mizrahi. “Bio-Glass and this award endorse the progressive mindset which we hold in high regard at CoveringsETC”.

The 2011 Crystal Achievement Award winners serve as a reminder of the glass industry’s incredible ingenuity and vast potential and they are all featured in the September issue of *Glass Magazine*, e-glass weekly (Sept 6<sup>th</sup> edition) and on GlassMagazine.com
