**FACT SHEET**

**COVERINGSETC** was founded by designer and real estate visionary Ofer Mizrahi in 1998 as an innovative source for natural, recyclable and sustainable material concepts for floors, walls, countertops, facades, terraces and other decorative surfaces.

As a member of the United States Green Building Council (USGBC), **COVERINGSETC** actively seeks out innovative and captivating environmentally friendly materials and solutions for projects that comply with sustainable design and bio-architecture standards. Their ECOVERINGS® collection, which has won awards, is crafted with naturally occurring and recyclable materials or with a focus on environmental conservation and the preservation of natural resources.

In the past twenty years, **COVERINGSETC** has established a reliable reputation for creating the best sustainable products available, which has earned them multiple accolades. Their awards include the Red Dot Design Award, Architectural Products Magazine Product Innovation Award, ICFF Editors Award, Glass Magazine Crystal Achievement Award for "Most Innovative Decorative Glass Product," and the Interior Innovation Award presented by the German Design Council.

## **ECOVERINGS® COLLECTION**

### **BIO-GLASS®**

#### **Launched 2007**

100% upcycled glass slabs made from beer, wine, and water bottles collected from recycling centers. Suitable for countertops, partitions, facades, and other decorative surfaces, BIO-GLASS® is crafted from 100% recycled and recyclable glass without any colorants or additives.

#### **Awards**

- Red Dot Design Award
- Glass Magazine Crystal Achievement Award “Most Innovative Decorative Glass Product”
- Architectural Products Magazine Product Innovation Award (PIA)
- Interior Innovation Award from the German Design Council

## **ECO-TERR®**

### **Launched 2000**

Precast Terrazzo Tiles and Slabs in a variety of contemporary colors giving a green alternative to poured Terrazzo.

Embrace quality and style with Eco-Terr® flooring and countertops – a green alternative to poured Terrazzo and made of recycled natural stone aggregates. Eco-Terr® comes in tile and slab formats and is durable and long-lasting with zero-VOC materials. It contains post and pre-consumer recycled content and may help contribute toward LEED® credits with USGBC project certification.

## **ECO-CEM®**

### **Launched 2000**

A fiber cement product suitable for walls, flooring and other decorative surfaces. Made up of a proprietary mix of concrete with pre-consumer recycled fly ash and post-consumer recycled cellulose fiber.

Emanate warmth in your surroundings with Eco-Cem®, a Future-Friendly™ material made of concrete strengthened with cellulose fibers. Contains both pre and post-consumer recycled content, and may help contribute toward LEED® credits with USGBC project certification.

## **ECO-GRES®**

### **Launched 2005**

Contemporary porcelain tiles with accompanying line of accessories made from pre-consumer recycled porcelain.

A Future-Friendly™ material made of unglazed through body porcelain.

Highly sustainable, easy to install and maintain. Slip resistant, scratch resistant, stain and fade resistant. No need to seal or wax. Contains pre-consumer recycled content; may help contribute toward LEED® credits with USGBC project certification.
